

An aerial photograph of a dense forest, primarily composed of evergreen trees. A straight road or path cuts through the center of the forest. Overlaid on the right side of the image are several concentric, semi-transparent circles that radiate from a point on the road, creating a ripple effect across the forest canopy.

Nordic voice, global reach

ao | acta
oncologica

Powered by peers in oncology

Acta Oncologica is a foundation and the official journal of the five oncological societies in the Nordic countries and the Nordic Association for Clinical Physics. We are dedicated to advance clinically relevant and impactful cancer research.

Since 1963, we are a forum for scientific communication across the broad field of oncology - from translational oncology to survivorship.

Acta Oncologica publishes clinically relevant content and hosts cancer research symposia. We are a voice for cancer research from the Nordic region, welcome international contributions and offer global outreach with readers in more than 50 countries. We take pride in an efficient peer-review process, thorough evaluation and fair decisions.

Join us as we continue to investigate, define, share and discuss new knowledge in oncology.

Nordic signatures

- Population basis
- Multidisciplinarity
- Cross-border collaboration
- Treatments and outcome in the forefront
- Translating discoveries for better care

We come from a region with a strong reputation for population-based data, multidisciplinary research efforts and cross-border collaborations.

The Nordic countries offer exceptional conditions for insights that can be translated into better care. Infrastructure and know-how provide new options. To us this is home and the base from which we welcome international contributions and aim for global outreach.

Clinical oncology cures cancer at a high rate. We strive for more. Join us in sharing, communicating and translating new discoveries into even better treatments and outcomes for patients affected by cancer.

Engagement across the broad oncology field

Committed to cancer research with clinical impact

Acta Oncologica is a forum for scientific publication and communication. We are dedicated to advance high-quality, clinically relevant cancer research across the broad oncology field.

Our editorial team is committed to efficient, rigorous and constructive peer-review and fair evaluations.

We welcome international contributions and offer global reach as we strive to publish impactful research with potential to influence future clinical oncology.

Our contribution

A forum for scientific knowledge-sharing

Publishing scientific works

Rigorous and constructive peer-review

Efficient and fair evaluations

Hosting cancer related symposia

What we do

Open to submissions including original research, review articles, letters and commentaries.

We welcome and publish research in:

- Cancer epidemiology
- Cancer diagnostics, biomarkers and precision medicine
- Medical oncology, radiotherapy and radiophysics
- Survivorship, rehabilitation, late side effects and palliative care
